Corporate Finance Analyst | Financial Modelling & Valuation | FP&A | Reconciliation & AI-Enabled Finance
Pune, India | +91 8956506020 | amitkadam1562@gmail.com | LinkedIn |Portfolio Link

## Professional Summary

Corporate Finance Analyst with experience in financial modelling, valuation, fundraising support, FP&A, and strategic finance across manufacturing, technology, logistics, healthcare, and asset management. Developed integrated 3-statement models, DCF and comparable-company valuations, 5-year forecasts and investor return analyses to support fundraising, enterprise valuation and management decision-making. Combines core finance expertise in profitability, working capital, cash flow and capital structure analysis with advanced Excel, Python, reconciliation automation and AI-enabled finance workflow automation.

## Professional Experience

**CapSurge Consulting Private Limited | Pune, India**

**Corporate Financial Analyst** | Jul 2026 – Present

**Corporate Finance Intern** | Dec 2025 – Jun 2026

- Built **financial models, DCF valuations and comparable-company analyses** for multiple private companies across manufacturing and sustainability-focused sectors; extracted and analysed financial data from **MCA filings**, developed 5-year projections, assessed revenue, margins, working capital, cash flows and capital structure, and identified key drivers of enterprise-value creation.
- Designed a **weighted peer-benchmarking framework** evaluating target companies across revenue growth, profitability, operating efficiency, working capital, returns and balance-sheet metrics; translated the analysis into management decks highlighting relative positioning, performance gaps and strategic priorities.
- Managed recurring **FP&A and management reporting** for a US healthcare business, including monthly P&L preparation, weekly operational dashboards, monthly MIS and a **rolling 13-week cash-flow forecast** using claims, appointment and operating data; automated the workflow in Excel and subsequently supported its conversion into a full-stack finance application, reducing manual effort by **90%+**.
- Led the design of an **investment reconciliation and finance-automation framework** for a Singapore-based wealth/asset-management business, covering multi-currency transactions across managed accounts, bonds, structured notes and pooled investments; developed matching logic, cash controls, exception reporting and audit-ready outputs, and subsequently designed a scalable multi-client reconciliation architecture.
- Supported **fundraising and investment-analysis work for an AI-based technology company**, contributing to financial modelling, investor pitch materials, market and company research, comparable-company analysis and financial/forensic analysis used to develop the investment narrative and fundraising assumptions.
- Supported financial and commercial analysis for **African EV and charging-infrastructure engagements**, contributing research on unit economics, market assumptions, revenue and cost drivers, capital requirements and financial-model inputs for feasibility and investment assessments.
- Led **end-to-end competitive benchmarking and market-positioning analysis** for a logistics-technology business, researching **12 competitors** across multimodal tracking, carrier coverage, geographic reach, system integrations, communication channels, functional capabilities and pricing; built a **weighted Excel scoring framework** to assess relative positioning and translated the findings into a management presentation highlighting competitive gaps and differentiation opportunities.
- **Designed and executed automated vendor and intercompany reconciliation solutions for a global logistics client**, covering ~**52,000 vendor transactions** and ~**24,000 India–US book transactions**; developed reference- and amount-based matching, grouped-transaction logic, duplicate-reference handling, exception analysis and structured reconciliation reporting, achieving approximately **94–95% auto-reconciliation** and materially reducing manual effort.

**Autobat Pvt. Ltd. | Pune, India**

**Finance Intern | May 2025 – Jul 2025**

- Analysed **production costs, operating expenses and working-capital trends**, including movements in inventory, receivables and payables, to identify cost inefficiencies, margin pressures and cash-flow improvement areas for monthly MIS and management review.
- Supported preparation of **financial statements, GST-compliant accounting records and management reports** using Tally ERP, contributing to accurate financial reporting, compliance and management visibility.
